Pisa, 18-20 May 2010
Area della Ricerca CNR

IMPORTANT DATES

- **Presentation proposal sent by May 3rd 2010**
- **Notification of Acceptation to authors (May 10)**

Automotive SPIN Italia announces the 7th Workshop on Automotive Software at the C.N.R. Research Area in Pisa - May, 21 2010.

The Automotive SPIN (Software Process Improvement Network) Italia is an organization composed of professionals from research institutions, car manufacturers, certification bodies and automotive software suppliers focused on software process improvement in the automotive domain.

The purpose of the Automotive SPIN Italia is to networking professional and researchers to share experiences and knowledge in the area of automotive software and embedded systems.

The Automotive SPIN Workshops are incomparable opportunities to understand the open issues and the hot topics from the automotive community.

The Workshops are organized as a mix of:

- Experience and lessons learned presentations from the automotive software industry
- Key notes on research and State-of-The-Art in Automotive software and system engineering and Standards
- Discussions and round-tables on hot topics for the automotive software process.

The 7th Workshop on Automotive Software will be held in conjunction with the International SPICE Conference 2010 (18-20 May 2010) www.spiceconference.org.

We encourage submissions of presentation proposals on any aspects of the Software Process and Software Engineering in the automotive domain, with particular interest on:

- Practical Experiences in the application of standards (e.g. ISO26262, ISO/IEC 15504-10)
- Use of AUTOSAR: practical problems and perspectives
- Integration testing for embedded software

Presentation proposals can be sent within May 3rd 2010 to giuseppe.lami@isti.cnr.it
