Conference 2010**

(www.spiceconference.org)

Pisa, 18-20 May 2010
Area della Ricerca CNR

Automotive SPIN Italia organizes the 7th Workshop on Automotive Software at the C.N.R. Research Area in Pisa - May, 21 2010.

The Automotive SPIN (Software Process Improvement Network) Italia is an organization composed of professional from research institutions, car manufacturers, certification bodies and automotive software suppliers focused on software process improvement in the automotive domain.

The purpose of the Automotive SPIN Italia is to networking professional and researchers to share experiences and knowledge in the area of automotive software and embedded systems.

The Automotive SPIN Workshops are incomparable opportunities to understand the open issues and the hot topics from the automotive community.

The Workshop is organized as mix of:

- Experience and lessons learned presentations from the automotive software industry
- Key notes on research and State-of-The-Art in Automotive software and system engineering and Standards
- Discussions and round-tables on hot topics for the automotive software process.

The 7th Workshop on Automotive Software will be held in conjunction with the International SPICE Conference 2010 (18-20 May 2010) www.spiceconference.org.

Workshop participation is free.

Automotive SPIN Italia

7th Workshop on Automotive Software

Pisa (Area della Ricerca del CNR) – 21 Maggio 2010

WORKSHOP PROGRAM

time	speaker	title
8.30		Registration opens
9.30	Giuseppe Lami	Welcome, SPIN's Activity report, Introduction
		Invited Talk
10.00		Alec Dorling The new release of Automotive SPICE: what's new
10.30	<i>SPICE Conf. organizers</i>	A report from the 10th Int.I SPICE Conference
11.00		coffee break & networking
11.15		Round Table: Automotive SPICE: Achievements, open issues and challenges
		Technical Session
12.00	Luigi Buglione	COSMIC: a new method for measuring software functional dimension
12.30	Fabio Falcini	Survey of Agile development Practices
13.00		Question time
13.15		Lunch break
14.15	John Favaro	Critical Automotive Applications: Robustness and Safety - a report from the conference CARS@EDCC2010
		Industrial Session
14.50	Jochen Olig	Bringing AUTOSAR on the street: Practical experiences
15.10	G. Meola, A. Sardini, R. Stokar	Model-based approach to System Quality
15.30		coffee break & networking
16.00		Round Table for Open discussion
17.00		Closure
